

# KEY TAKEAWAYS

## COURSE TITLE

**SQL Advanced: Supply Chain Analytics**

## CHAPTER TITLE

**Subquery vs CTE vs Views vs Temporary Table**

- 1** Common table expression (CTE) is more readable than a subquery and is reusable.
- 2** Subqueries are beneficial as they can be used in WHERE and SELECT statements.
- 3** Understanding the difference and applications of Subquery, CTE. Temporary tables and Views are critical to work with SQL.
